

Good performance in 500 times transverse loadings

Eccentric nut

Anaerobic adhesive

(5,9kN)

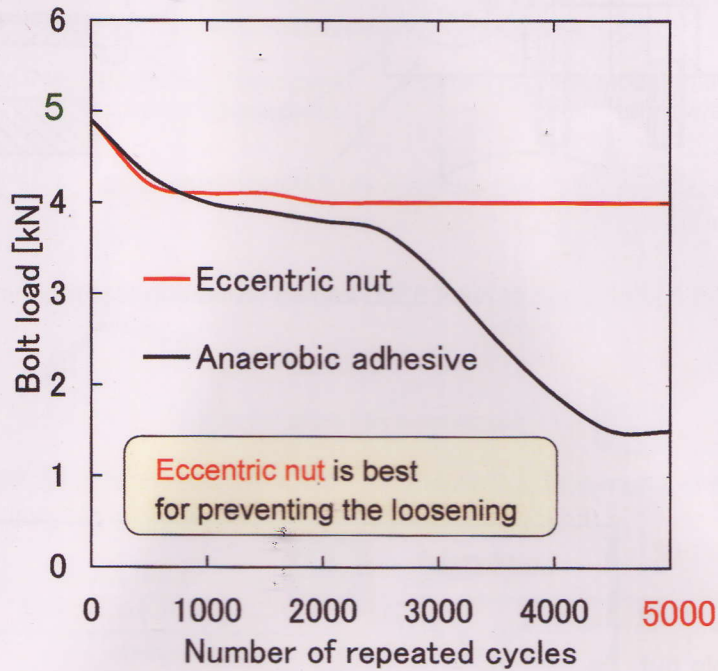

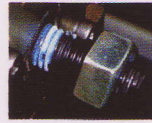

Figure-4 (a) The result in the loosening test using Junker's machine (Bolt preload is 5kN, the maximum number of repeated cycles is 5000)

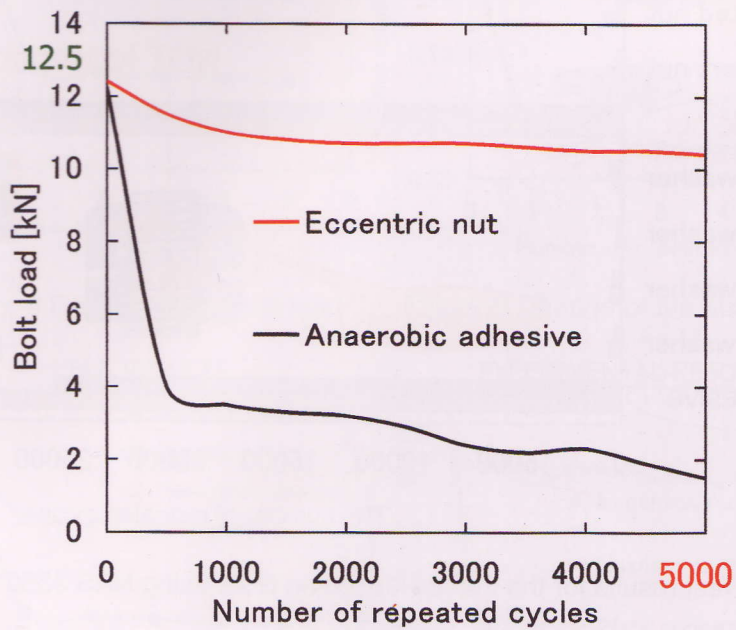

Figure-4 (b) The result in the loosening test using Junker's machine (Bolt preload is 12.5kN, the maximum number of repeated cycles is 5000)
